WHO WE ARE

A South African security company built on people and technology

Rush Fox Security and CCTV (Pty) Ltd, trading as **Rush Fox Security**, is a 100% black-owned private security company registered with CIPC in May 2021 and with the Private Security Industry Regulatory Authority (PSiRA).

Headquartered in Mokopane, Limpopo, we protect retail stores, wholesalers, commercial properties and businesses across Mokopane and Polokwane. Our model combines disciplined, PSiRA-registered security officers on the ground with modern electronic security: CCTV surveillance, access control, alarms and perimeter protection, so every site is guarded, watched and recorded.

The company was founded by Malesela Fanny Banda in response to rising crime and the gap between what clients need and what the market was delivering. Our goal is to be the security partner that private and public sector clients can rely on: fully compliant, responsive and accountable.

Vision

To be one of South Africa's most trusted and recognised security companies, known for integrity, compliance and the smart use of security technology.

Mission

To protect our clients' people, assets and operations with well-trained officers, reliable electronic systems and fast, accountable service, delivered in full compliance with South African law.

OUR CORE VALUES

What we stand for

Integrity
Honest reporting, transparent billing and ethical conduct on every site.

Compliance
PSiRA, SARS, COIDA, bargaining council and labour law obligations met as standard.

Vigilance
Officers and systems that watch, detect and act before losses happen.

Accountability
Clear supervision, occurrence records and reporting you can audit.

Innovation
Modern IP CCTV, smart access control and remote viewing built into our service.

WHY CHOOSE RUSH FOX

Six reasons clients trust us

Guarding and technology from one provider
One contract, one point of accountability for officers, cameras, access control and alarms.

Fully compliant and tender-ready
PSiRA-registered, on the Central Supplier Database (MAAA1525265), CIDB-registered and B-BBEE Level 1 (EME).

Graded, trained officers
Security officers registered with PSiRA, graded A to C, with site induction and refresher training.

Supervision that shows up
Mobile supervisors with GPS-tracked vehicles conduct site visits and inspections.

Evidence, not excuses
Occurrence books, incident reports and recorded CCTV footage support every investigation.

Local, responsive and scalable
Limpopo-based management with the structure to take on new sites and regions quickly.

> “Protect. Detect. Respond. Our officers protect, our technology detects, and our team responds.

SERVICE LINE 1

Manned Guarding & Protection

Our PSiRA-registered security officers are the visible deterrent on every site. They are vetted, uniformed, equipped and supervised, and work to written post instructions agreed with the client.

Static & Site Guarding

Day and night shift security officers (Grades A to C; D and E as required) for retail, commercial, industrial, residential and government sites.

Manned Access Control

Gatehouse and entrance control: visitor and vehicle registers, searches, permits and key control.

Patrols & Supervision

Foot and vehicle patrols, site inspections and mobile supervisors to keep standards high.

Retail Security & Loss Prevention

Uniformed and plain-clothes officers, exit checks and shrinkage control for stores and wholesalers.

Event Security & Crowd Control

Planning and staffing for events, functions, meetings and public gatherings.

Close Protection (VIP)

Bodyguarding and protection of executives and dignitaries, by arrangement.

Reaction & Response

Response to alarm activations and incidents at contracted sites, by arrangement.

Car Watch & Parking Security

Parking area protection for shopping centres, offices and events.

Construction & Project Site Security

Asset protection for construction sites, plant, materials and stock yards.

Standard officer equipment

- Full corporate uniform
- Two-way radio / cellphone
- Torch
- Baton & handcuffs
- Pepper spray
- Metal detector (where required)
- Occurrence book
- Access control register
- Pocket book
- Firearm register (armed posts)

SERVICE LINE 2

Electronic Security & Technology

We design, install, commission and maintain integrated electronic security systems, from a single camera to multi-site surveillance, access control and perimeter protection, with full after-sales support.

CCTV Surveillance Systems

Design, supply and installation of HD analogue and IP camera systems: bullet, dome, PTZ, night-vision and 4MP/8MP (4K) cameras with NVR/DVR recording.

AI Video Analytics & LPR

Line-crossing, intrusion and person/vehicle detection; licence plate recognition (LPR/ANPR) for gates and car parks.

Remote Viewing & Monitoring

Client live view and playback on mobile and desktop, event alerts and cloud backup; off-site monitoring arranged per site.

Electronic Access Control

Biometric (fingerprint and face), card and tag readers, keypads, time-and-attendance and door controllers, designed to keep emergency exits compliant.

Turnstiles, Boom Gates & Automation

Pedestrian turnstiles, boom gates, sliding and swing gate motors and garage automation.

Intercom & Video Intercom

Audio and video intercom systems for gates, complexes and offices.

Intruder Alarm Systems

Wired and wireless alarms, PIR and beam detectors, panic buttons and armed-response linking.

Electric Fencing & Perimeter Detection

Electric fence installation and repair by a registered electric fence installer, with certificate of compliance; outdoor beams and perimeter detection.

Fire & Smoke Detection

Smoke and heat detection integrated with alarm systems; certified fire installations scoped with accredited fire-detection partners.

Networking & Connectivity

Structured cabling, PoE switching, Wi-Fi bridges and 4G/LTE links for remote sites.

Backup Power for Security

UPS, inverter and solar backup for cameras, alarms and gates; electrical work certified (CoC) by a registered electrician.

Locksmith & Physical Security

Locks, safes, burglar bars and security doors to harden premises.

SERVICE LINE 3

Security Consulting & Risk Management

Security Risk Assessments & Audits
On-site surveys and written risk reports with practical recommendations.

CCTV Layout Planning
Camera placement plans and coverage analysis before any installation.

Officer Training & Site Induction
Site-specific induction, post instructions and refresher training for officers.

Security Plans & Procedures
Post orders, emergency procedures and access control policies for your site.

Maintenance & Service Level Agreements
Preventive maintenance, health checks, firmware updates, repairs and fault call-outs for systems we install and for existing systems we take over.

HOW WE WORK

Our five-step approach

1 — Site Risk Assessment
We inspect the site, identify threats and weak points, and review existing measures.

2 — Security Plan & Design
A written proposal: officer deployment, camera layout, access points and costs.

3 — Deploy & Install
Officers are placed, briefed and equipped; systems are installed and commissioned.

4 — Monitor & Supervise
Supervisor visits, CCTV review, occurrence records and incident handling.

5 — Report & Improve
Regular client reporting, reviews and recommendations as risks change.

SECTORS WE SERVE

- Retail & wholesale
- Commercial property
- Government & municipalities
- Schools & education
- Healthcare facilities
- Industrial & warehousing
- Construction sites
- Mining & agriculture
- Residential estates
- Events & hospitality
- Motor dealerships
- Transport & logistics

Free site risk assessment
Book an on-site security survey and receive a written risk report with a tailored guarding and technology proposal.

Legislative framework we operate under: Private Security Industry Regulation Act 56 of 2001 and PSiRA Code of Conduct · Basic Conditions of Employment Act and Sectoral Determination / NBCPSS agreements · Labour Relations Act · Occupational Health and Safety Act · COIDA · Protection of Personal Information Act (POPIA) for CCTV footage and access-control records.

LEADERSHIP

Owner-managed, hands-on leadership

Malesela Fanny Banda

FOUNDER & DIRECTOR

Founder and sole director of Rush Fox Security. A PSiRA-registered security officer trained to Grade A (Grades E to A completed in 2022), Mr Banda leads strategy, client relationships and compliance personally, so every client has direct access to decision-making.

OPERATIONS

How our sites are run

Personnel

PSiRA-registered officers across Grades A to C, with Grades D and E available as required. Officers are screened and their PSiRA status is verified before deployment.

Training & Discipline

Site induction, post instructions and refresher training. Clear disciplinary procedures in line with labour law and the PSiRA Code of Conduct.

Supervision & Vehicles

Supervisors in GPS-tracked vehicles carry out site visits, shift checks and incident follow-up.

Records & Reporting

Occurrence books, access-control registers, incident reports and CCTV evidence kept for every site and shared with the client.

Communication

Two-way radios and cellphones on every post, with escalation lines to supervisors and management.

Data Protection

CCTV footage and access records handled in line with POPIA: restricted access, defined retention and secure storage.

CLIENTS WE HAVE SERVED

- Fairplay Stores
- IE Bhyat Property Holdings
- Ismails Wholesalers
- AKT Investments
- Save Point
- Metro
